

There is absolutley no reason that petition 04-160 should be passed. Local FM stations need to step up their game and provide content that is on the same level as the satellite radio providers. Why should the consumer be punished for not wanting to hear 45 minutes of commericals and dj talk and 15 minutes of music? If local stations could provide me commercial free music, and weather and traffic reports on a reliable schedule then that is what I would be listening to.

Please don't make me suffer through 20 minutes of pointless drabble to hear about the traffic I got done driving through while waiting for the report.
